All Codes

Terms and General Conditions of Delivery

Prices quoted in this list go into effect immediately for spot sales and 1955 crop contracts, superseding all previous quotations. All orders of 4 ounces or over will be charged at the pound rate; all orders under 4 ounces will be charged at the ounce rate.

The minimum charge for each item billed will be fifty cents, due to the increased cost of handling small orders.

All seeds are quoted F.O.B. El Monte, California, terms 60 days net, less 1% cash 30 days. All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable.

We reserve the right to change any or all prices in this list without notice.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery.

BODGER SEEDS LTD. warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container, within recognized tolerances. Seller gives no other or further warranty, express or implied.

Should fulfillment of any order or contract be prevented or delayed by the act of God, war, blockade, revolution, prohibition of exports or imports, riots, strikes, lockouts, fires, loss and/or detention at sea or any other contingency beyond our control, we shall not be responsible for any loss and/or damage thereby.

MAY WE BE OF ^{extra} SERVICE?

EKTACHROMES: If you need Ektachromes for full color reproduction purposes (either letterpress engravings or lithographic separations) we can supply high quality color photographs on a loan basis, the Ektachrome to be returned after use. **MADE UP TO ORDER ONLY.** Please allow two weeks for completion of your order.

4 x 5 inches	Each Subject \$ 6.75
8 x 10 inches	Each Subject 10.00

PHOTOGRAPHS: We can supply, at cost price to us, professional quality photos of (1) all varieties of which we offer seed, (2) most varieties we have listed in recent years, and (3) certain subjects we do not normally grow; usually several poses of each subject. All photos are 8"x10" contact, single weight glossy paper. Each \$1.00

COLOR PHOTOGRAPHS: We can supply dye-transfer color photos equal in quality to the above but in full color. 8"x10", projected from professional-size Kodachromes onto double weight semi-matte paper. Mounted between white artist's board, 11"x14". All color prints are supplied mounted unless requested otherwise. Selection limited only by our library of Kodachromes. Each \$10.00

KODACHROME SLIDES: We can supply high-fidelity 35mm slides (2" x 2") of any subject listed under "Color Photographs." These are close-ups of individual flowers or groups, projected from our professional-size originals. An order for ten slides or more receives a 10% discount Each \$.50

(Continued on next page)

MAY WE BE OF EXTRA SERVICE?

R.H.S. HORTICULTURAL CHART: The numbers in italics following Sweet Pea descriptions refer to color blocks in the R.H.S. Chart, the most complete ever compiled for horticultural uses. Obtainable from us or from the Royal Horticultural Society direct.

Full sets (2 volumes) only.....\$12.00 set

ELECTROS: We can supply electrotypes for use in printed matter of a great number of the pictures offered above. 120 screen, usually square finish. Chosen from our Electro Catalog, our seed catalogs, or a selection of photos, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order. Prices below apply to copper. For nickelsteel, add 25%.

COLOR PLATES: We have a large selection of color plates available. 120 screen, square finish, vinyl mold nickelsteel. Chosen from our Electro Catalog, our seed catalogs, or proofs submitted, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order.

ELECTROS AND COLOR PLATES ARE SUPPLIED UNMOUNTED (PATENT BASE) UNLESS MOUNTING IS SPECIFICALLY REQUESTED. THERE IS AN ADDITIONAL CHARGE OF 25% FOR MOUNTING. If we do not have an electro the size you need, you can purchase a photo and have your printer make a cut for you. Electro Catalog available free.

ELECTRO PRICES ARE AS FOLLOWS:

Note: OUR ELECTRO PRICES DIRECTLY REFLECT THE STANDARD ELECTROTYPERS' SCALE IN LOS ANGELES, WHICH IN TURN REFLECTS THE HIGH WAGES NOW PAID IN THE ENGRAVING INDUSTRY. WE CANNOT CONTROL THIS. BEFORE ORDERING, CONSULT YOUR PRINTER. IN SOME LOCALITIES HE MAY BE ABLE TO HAVE ENGRAVINGS MADE AT LOWER COST THAN OUR PRICES.

SIZE	APPROX. DIMENSIONS	BLACK & WHITE	4-COLOR PROCESS
A	1¼"x1½"	\$ 2.75

J	5"x6"	7.50	55.00
K	Larger	12.00	70.00

Some, but not all, pictures are available in several sizes.

THE STORY OF BODGER'S WILT-RESISTANT ASTERS

For hundreds of years horticulturists have developed the China Aster until it is one of the most colorful of the late summer annuals. About twenty years ago, however, the disease Aster Wilt became so widespread that it threatened the very existence of the Aster family. The problem was this: Wilt is caused by the fungus *Fusarium conglutinans* var. *Callistephi*, which lives in the soil. It may be spread by tools, water, seed—and it persists almost indefinitely. It may be avoided by using soil that has never grown Asters before, but this course is usually impractical. There is at present no drug or chemical which will destroy it. How, then, is Aster Wilt conquered?

The process developed by Bodger Seeds Ltd. in its pioneer work is much like vaccination in human beings: Plants are exposed to the Wilt and those which survive supply seed for the next generation of test plants. This work is carried on in the Wilt Workshop, a twenty-acre farm staffed by Bodger experts which is devoted solely to wilt work and is purposely infected with as much wilt as possible.

The tendency to wilt-resistance can be inherited, so the plants grown from the seed produced the previous year are quite resistant—but the process does not stop there. Many successive generations are grown in the Workshop until the best lines have great resistance. By means of this technique—survival of the fittest—Bodger's original strains of wilt-resistant Asters were developed.

In all cases it is resistance, not immunity, which is developed. The tendency toward resistance is inherited, and will "breed out" if the strain is not put through the Workshop cycle periodically. All Bodger Aster introductions are developed in the Workshop, and each year's stock seed comes directly from a two-generation exposure to wilt of a virulence not found in ordinary soil. Your Bodger Aster seed is highly resistant. Even a few generations of increase in non- or lightly-infected soil will produce seed of decidedly less resistance.

Resistance is hereditary, and so are plant and flower types. Bodger wilt-resistant strains are developed from non-resistant, **Commercial** varieties, quite true to type—not from crosses between commercial and inferior, though resistant, types. Because we take pride in maintaining this accuracy of type, some varieties are not offered as wilt-resistant. At present we cannot make these resistant without sacrificing essential qualities of type, and we do not recommend their use where wilt has been observed. Combining wilt-resistance with good commercial types is not easy; since there will always be some variation. Resistance is expressed as a percentage, a high value of which is required to qualify as "wilt-resistant."

The war against wilt is a continual one, complicated by bad weather breaks which sometimes wipe out a long chain of selection work. Among commercial growers, Bodger Seeds Ltd. is the pioneer in wilt work, and the only firm actively engaged in continual research. Your Bodger wilt-resistant Aster seed is of high quality, true to type, and as wilt-resistant as we can make it. Because of this research work, wilt is no longer a problem to the careful grower who makes sure he has resistant stock.

Asters

All Asters listed here can be grown by the home gardener wherever Asters are popular. The non-resistant Giants require care to avoid wilt infested ground, but yield tremendous "show" blooms for the careful gardener. Most of these Asters are also in great demand as florist's commercial varieties, especially those marked "f". In any case, seed we offer is of highest florist quality.

PRINCESS ASTERS (BODGER)

An ideal type for florists, suitable also for home gardens. Flowers have crested center that remains full when flower is completely open, surrounded by multiple rows of guard petals.

ASTER BEDDING PRINCESS WILT RESISTANT (Marsha type)

New, compact branching plant form (identical with that of the variety Princess Marsha) 20"-24" high, completely covered with 3" true Princess flowers when plants bloom in late August. Long stemmed blooms keep excellently when cut, while plants provide the best garden landscaping color when planted at 9" spacing.

		Per oz.	Per lb.
NEW890 AZURE BLUE	2.00	20.00
822 MARSHA, cinnabar scarlet	2.00	20.00
NEW902 MID-BLUE	2.00	20.00

	shadings	2.00	20.00
NEW914 ROSE, medium rose	2.00	20.00
NEW920 WHITE, pure white	2.00	20.00

ASTER PRINCESS WILT RESISTANT (f) (Tall branching strain)

The standard tall branching Princess Aster that has been used by florists since our introduction of the type 20 years ago. 2'-2½' plants bear long-stemmed 3"-3½" flowers blooming in late August. For home garden use we suggest the new Bedding type above.

....818	ALICE, bright azure blue	2.00	20.00

We cannot accept orders for less than one trade packet.

F₂ Hybrid Petunias

THE STORY OF CARNIVAL

Hybrid vigor in controlled cross-pollination is a principle so well established by hybrid corn that the story of hybrid advantages no longer need be told. The new applications with different classes of plants and with new ideas utilizing the hybrid advantages are the things that draw gardeners' attention now.

With F_1 hybrid petunias such a success in this field because of their extreme uniformity, vigor and floriferousness, Bodger opens another avenue by the introduction of an F_2 mixture named Carnival. In this generation, by utmost care and painstaking preparation, a contrasting color effect from the F_1 hybrids is gained, still maintaining the vigor and free flowering habit resulting from the crossing of unrelated lines.

Carnival presents an astonishing variation of colors instead of just a single one. By crossing only inbreds with proved interactions, we produce a special kind of F_1 to obtain in the second generation what is without doubt the greatest range of color ever seen in petunias. It is no trick at all to count 20 different shades in a moderate sized planting. These include crimson, blue, salmon, red, white, rose, shades of pink, and a fascinating series of variegated white and rose or white and blue flowers.

The flowers are large, measuring from 3 to 4 inches across, with fringed and ruffled petal edges of the typical grandiflora type. As in regular grandifloras there are some smaller, plain edged flowers but these together with intermediate segregates total no more than 20% and are hard to find in the mass of large blooms.

Carnival plants reflect moderate segregation relating back to the parent lines, but the selected ancestry insures ample uniformity for bedding, with compact, dwarf plants all clearly showing hybrid vigor.

To properly introduce this new idea in breeding to the public, Bodger offers an array of illustrative material designed to accompany a first class publicity program. Ektachromes in 4" x 5", 8" x 10" and 35mm are available in many poses from field views and greenhouse breeding backgrounds through planted beds in patio settings to flower arrangements in vases and table settings and to closeups of several colors to show detail. Black and white 8 x 10's of this same series are also in stock. Then there are several four-color engravings of varying sizes from which electros may be purchased, and printed display material such as posters are also obtainable on request. Both Schmidt and Stecher-Traung are making color packets.

The price is another attractive thing about Carnival. Instead of listing at \$225.00 per oz. as in the F_1 grandifloras, Carnival lists at \$30.00 per oz., in the same price range as standard varieties like Theodosia. This makes the seed useful to everybody instead of to the limited market served by the F_1 hybrids.

Sweet Peas

With the continually increasing number of sweet pea types being introduced there is inevitably a certain amount of confusion between classes. To make the types as clear as possible and to introduce new classes in their proper position, we summarize here the three broad classifications of early, spring and late with the new Zvolanek types in their proper location.

EARLY (Winter Flowering)

This group of sweet pea varieties includes only those which will flower under short-day conditions. In mild climates these are fall-planted for bloom from Christmas onward. In areas with severe winters they are planted as early as possible in the spring and provide the first flowers, although not nearly so much earlier as when fall planted. The usual series in this class is the **Early or Winter Flowering Spencer**, and a very wide range of colors is available in this group. Newer, and more vigorous in plant as well as carrying more florets per stem is the **Zvolanek Multiflora** series.

SPRING

The **Cuthbertson Spring Flowering** group is well known for its greater vigor and greater heat resistance than comparable maturities. While this is not a short-day type and will not be rushed into bloom even in mild climates until the days become long enough, it does provide the best answer to reliable sweet pea crops where spring planting is the rule and where early summer heat is a hazard. **Cuthbertson Floribundas** are the newer, stronger varieties in this class. **Zvolanek Floribundas** belong in this same maturity class, and their characteristically longer, stronger stems and greater number of florets per stem make them a very interesting and worth-while addition to the sweet pea family. These are very new and in limited distribution as yet. Both types bloom about 2 weeks earlier than the late flowering types.

LATE (Summer Flowering)

Where cool weather persists during the summer this group is the most satisfactory for it has the largest plants and produces the heaviest crops of all. The standard strain is **Late or Summer Flowering Spencer**, and a long list of varieties is available. In this same classification is the brand new **Zvolanek Plentiflora** series. These varieties are available only in strictly limited quantities this year, but they exhibit the same advantage in number of florets in comparison with the Spencers as the other, earlier Zvolanek introductions.

The numbers in parenthesis following Sweet Pea descriptions refer to color chart readings. See page 3.

SWEET PEA EARLY or WINTER FLOWERING SPENCER (af)

The variety we consider best in each color class is indicated by an asterisk (*).

	Per lb.
....6858 *ANNIE LAURIE, pure rose, white base, vigorous 625.	3.00

....7138 CHOICE MIXED	2.25

NEW SWEET PEA ZVOLANEK MULTIFLORA (af)

A garden sweet pea more vigorous than any other, yet true winter flowering for florists. Under ideal conditions Multifloras produce longer and stronger stems, larger florets and more of them. Under any conditions they produce an average of two more florets per stem than the strain you're now using. We recommend this.
